

HISTORY

Etternity Dermal S.L. is a company with worldwide reputation, specializing in aesthetic medicine. It produces and commercializes cosmetic solutions and medical devices, which are effective and tested in accordance with international standards.

The brand PRESSENSA appeared in the year 2013, becoming a trademark of Etternity Dermal, as a result of a long-term research of Spanish scientists and innovators in the cosmetology field.

For more than 15 years our team of scientists have studied actively the process of skin aging. They have developed a series of dermatocosmetic products for complex treatments, rejuvenation, preserving the beauty and skin health. The brand PRESSENSA quickly gained a worldwide reputation based on the superiority and quality of the product. PRESSENSA uses the most innovative technologies to create a product which is truly amazing.

Today we are present in almost all the European capitals and in many major cities of the world. We develop dynamically and we are on the threshold of new discoveries.

The quality of our products convinces of its effectiveness even the most skeptical cosmetologists and their clients.

Thanks to our products, we want to improve the modern methods of anti-aging or skin defects and to rise the quality of cosmetology services at the highest level. Our objective is to meet the quality of future requirements of the consumers.

future

PHILOSOPHY

The philosophy of the brand **PRESENSA** is supplying of professional, high quality products on the basis of the latest progressive developments. Our fundamental principle consists in the satisfaction of a very demanding market, creating high quality products, with the highest standards of safety. We are firmly convinced that these innovations will have a real impact on the market of aesthetic medicine, since the requirements of such procedures are constantly increasing.

Produce Advanced active products that form a wide logical range to satisfy the requirements of the professional of the aesthetic medical sector.

Take care of the evolution of the cosmetic market by proposing innovative products and personalized concepts.

PRESENSA respects the rules of Good Manufacturing Practices of the European Union, emphasizing its commitment to guarantee the production of transdermal solutions that respond to the professional's demand in their search for the best treatments.

Walid. S. Abosaif,
Executive Director

UNIQUE MEDICAL & COSMETIC LINE

Currently, the **Molecular Cosmetics is the New Technology of Skin Rejuvenation**. The exclusive synergistic formulas of mesotherapeutic cocktails have been created to get a better interaction of the different active ingredients, so that their combined effect results greater than the effect of the individual components.

These **innovative formulas** have been obtained as a result of the long-term research in the field of **Chemistry and Bioengineering**.

PRODUCTION

There are three keywords that determine the concept of the products: efficiency, safety and quality.

- 1 EFFICIENCY** The purpose of creation of the cosmetic line Pressensa is to get the visible results of the product in the shortest possible time.
- 2 SAFETY** All Pressensa products are developed and manufactured in the laboratories of Eternity Dermal. Product safety is of primordial importance. Our laboratories use hyaluronic acid of high purity of the medical pharmacopoeia, obtained by bacterial biofermentation.
- 3 QUALITY** The teams of production and quality control collaborate between them to produce safe and high quality products.

FILLERS

PRESSENSA SEDUCTIVA

A new generation of Cross-linked Hyaluronic Acid fillers PRESSENSA SEDUCTIVA is sterile, highly tolerated, viscoelastic filler made with cross-linked hyaluronic acid, ideal for subcutaneous applications.

Monophasic Cross-linked Hyaluronic Acid easy to handle PRESSENSA SEDUCTIVA is a CE 0373 injectable, a pyrogenic, resorbable medical device made with cross-linked hyaluronic acid created from non-animal sourced bacterial bio-fermentation. It is a colourless monophasic gel contained in a disposable prefilled, ergonomic syringe with a Luer Lock adapter that makes it easy to handle.

Minimize any hypersensitivity reaction PRESSENSA SEDUCTIVA is manufactured under the strict controls of the certificates ISO 13485 and ISO 9001. Electronic verifications carried out throughout the entire filler production and packaging process to ensure quality, purity, and safety.

The extremely low concentration of nucleic acids and protein, and the bacterial endotoxins rate < 0.5 EU/ml (much lower than the limit established by the European Pharmacopoeia for injectable products) minimize any hypersensitivity reaction.

Result is very natural and immediately visible PRESSENSA SEDUCTIVA has an immediate lifting effect, thanks to its intrinsic viscoelastic and hydrophilic properties, which help recreate the desired. (20mg/ml, 25mg/ml) The concentration H.A. allows reducing any type of deep wrinkles, reshaping the face contour and lips, and hydrating the skin in depth.

SEDUCTIVA MEDIUM

Seductiva Medium Indicated for use in lip filling and lip volume contours, nasolabial wrinkles, oral commissures (marionette lines) and redefine glabellar lines.

Seductiva Medium is able to bind water molecules, with the result that it is possible to fill in wrinkles in a totally natural way without distortions whatsoever.

In any case, it must always be remembered that, in the case of absorbable filler, the same is maintained within the dermis for a time that goes to the maximum from 8 to 12 months, after which is completely reabsorbed, fading consequently also what is the effect aesthetic obtained.

Precisely for its particularity, hyaluronic acid lends itself to fill wrinkles, folds, grooves or, finally, to increase the volume of the lips, of the cheekbones or chin.

ADVANTAGES

- High tolerability with virtually no endotoxins or other free toxic substances;
- Very natural results and instantly visible lifting effect;
- Easy to handle and intrinsic product safety facilitate the physician performing the treatment.

Concentration	20 mg/ml
pH	6.00 – 7.50
Molecular weight of starting Hyaluronic Acid	2400-4000 kDa
Total endotoxins	≤ 0.5 EU/ml
Cross-linking agent	BDDE
Volume per syringe	2 x 1 ml
Estimated duration of Results	8 to 12 months
Needle	27G 1/2" TSK / Cannula
Conservation	5-25°C
Sterilisation:	Autoclave
Injection Depth:	Hypodermis , Mid-level / deep dermis
Injection Methods	Linear, Retrograde, Layer-by-layer, Radial, Bolus.

Correction of mid-level wrinkles

Correction of crease marks

Lip contours

Volume modelling of the lips

Corners of the mouth

Correction of scars

immediately

Filler based on 2% hyaluronic acid crosslinked with BDDE
CE n. 0373 Injectable Medical Device
PACK : 2 syringes of (1 ml) each with 4 TSK needles.

SEDUCTIVA VOLUME

SEDUCTIVA VOLUME has an immediate lifting effect, thanks to its intrinsic viscoelastic and hydrophilic properties, which help recreate the desired volume. 25mg/ml concentration H.A. allows reducing any type of deep wrinkles, reshaping the face contour and lips, and hydrating the skin in depth.

SEDUCTIVA VOLUME is injected subcutaneously to eliminate or reduce deep wrinkles and increase soft tissue volume (lips, cheekbones, cheeks) for face contouring or reconstructive procedures (depressed scars, acne or chicken pox outcomes, facial asymmetry and atrophy, non-surgical rhino up to 12 months from treatment).

The treatment can be safely repeated once the filling effects are significantly attenuated. To work with and intrinsic safety facilitate the physician performing the treatment. After thorough cleansing and disinfection of the skin, a few microinjections in the areas to be treated are all it takes. The treatment is well tolerated and not painful.

ADVANTAGES:

- Is sterile, highly tolerated, viscoelastic filler made with cross-linked hyaluronic acid, ideal for subcutaneous applications.
- Helps increase the volume of the dermo-epidermal tissue thanks to the natural ability of hydrophilic hyaluronic acid molecules to attract a moderate amount of water molecules and bond with them.
- Full integration of the intercellular matrix, whilst filling intradermal spaces and making the tissues firmer. The cross-linked hyaluronic acid contained in the product makes this filling effect longer lasting and more stable.

Concentration	25 mg/ml

DEPIGMENT

Best selection of actives:

Acts to equalize the production of melanin, restore balance to your skin tone, and brighten existing dark spots. A unique formula with proven highly effective ingredients, indicated to reduce localized hyperpigmentation such as age spots, or sun damage.

- Combating localized hyperpigmentation such as freckles, age and sun spots.
- Energizing and revitalizing skin cell action.
- Brighten the complexion of the skin.
- Increases production of collagen and elastin.

PEELINGS

PRESSENSA LUMINOSSA TCA

Dermo-epidermal Peeling- Medium to deep

The LUMINOSSA TCA Peeling- Medium to deep is a medical CLASS I product based on TRICHLOROACETIC ACID (TCA) (up to 12%); stabilized with alpha-hydroxy acids. It also contains Mandelic Acid (up to 6%); and KOJIC ACID (up to 6 %); Its unique formula in gel form allows the stabilization of TCA thanks to strong cocktails and weak acids present in the formulation and mixed with a stoichiometric manner to make the treatment stable, safe and effective.

INDICATIONS

- Revitalizes dermis and epidermis
- Contrasts fine wrinkles
- Combats Chrono- and photo aging causing by Sun damage
- Contrasts skin hyperpigmentation
- Anti-acne action, both on active acne and on recent acne scars
- Action on blackheads
- Astringent effect on enlarged pores
- Skin that has developed brown spots
- Wrinkling caused by the onset of aging
- Complexion that has become dull

Rapid action
Painless
No frost effect
No post-treatment sign
Instant result that improves over time
Suitable for all ages
Not photosensitizer

Wellness Exfoliation

Effectiva Method in 3 steps:

2 Routes to achieve perfect skin:

Route A.

The skin's youthful look and tone is restored

Route B.

Increases production of collagen and elastin

DERMO REPAIR

Skin Repairing Process

Recovery Solution to Damaged and irritated Skin.

The skin repairing process is followed by three intersection stages: inflammation, proliferation and remodelling.

With its advanced Formula, **Dermo-Repair** regulates these aspects and accelerates the skin recovery process to restore compromised or damaged skin barrier back to healthy skin barrier.

Arnica Montana

Its Flower Extract enhance the appearance of dry or damaged skin by reducing flaking and restoring suppleness

Centella asiatica

Is used as an active compound in skin care preparations because its antioxidant, anti-inflammatory, anti-cellulite and antiaging activity. Therefore Centella asiatica extract rich in triterpenes is a valuable raw material with a broad spectrum of cosmetic action. Centella asiatica extract is a rich source of natural bioactive substances, triterpenoid saponins, flavonoids, phenolic acids, triterpenic steroids, amino acids and sugars. Thus, many scavenging free radicals, exhibit anti-inflammatory activity and effect on the stratum corneum hydration and epidermal barrier function

MALVA:

Is dedicated to skin care cosmetics and cleansing products where protection and moisturisation are requested; it provides conditioning and film-forming properties, with moisturising, soothing and protecting effects on skin; it improves skin tolerability.

Panthenol:

Vitamin B5 have the same biological activity and Panthenol can be converted (by oxidation) to vitamin B5 in the skin. Pantothenic Acid is found in all living cells and tissues and is essential for normal metabolism and hormone production.

Hydrolyzed collagen:

Used in skin-care products enhances the appearance of dry or damaged skin by reducing flaking and restoring suppleness. Scientific Facts: Hydrolyzed Collagen generally is adsorbed on hair, increasing tensile strength and elongation. It is also used in soaps to impart a soft texture to skin.

Sodium Hyaluronate

It replaces the skin's natural Hyaluronic Acid content, which diminishes with age and with exposure to various environmental factors that cause moisture loss.

It increase a formulation's stability and to reduce the probability of oxidization. It also enhances the skin's absorption of other nourishing

Sodium Hyaluronate also restores the skin's moisture, promoting a more revitalized and youthful complexion and smoothes the appearance of wrinkles and improves the skin's texture.

INDICATIONS:

Post-procedure treatments (Mesotherapy, Pelling, etc.)

Post-acne treatments

After-shave products

Sun-burn soothing products

Night recovery creams

Promote cell proliferation

Upregulate expression of growth factors

Accelerate wound healing via epigenetic pathway

CreaMask Moisturizer

Moisturizer is an absorbent and hydrating day mask with MARSturizer™ and Hyaluronic Acid. MARSturizer™ is a synergistic complex of active ingredients derived from plants. Increases hydration and reduces transepidermal water loss (TEWL). Improves the level of hydration of the stratum corneum (EC) after a single application, immediately and with a long duration. It has immediate and long-lasting effects after just one application: Increases the hydration level: from 3% to 5% in 24 hours and 1% in 8 hours and increases the concentration of FHN in the upper EC for 24 hours.

As for hyaluronic acid, it provides hydration and increases volume. Thanks to its great ability to attract and retain water, it deeply rehydrates the epidermis of the treated area. It can also increase the thickness and volume of the skin and reduce furrows, making the skin look smoother. Provides rapid hydration and acts for 24 hours, giving the skin maximum softness, flexibility and a healthy outlook.

30 ml

Intense C+ VitaSerum

Formulated to stimulate the production of collagen and elastin. Among its components figures the ARGIRELOX™ which acts synergistically to combat wrinkles, signs of aging and the appearance of expression lines, whereby the skin becomes softer, more flexible. Vitamin C: magnesium ascorbyl phosphate, powerful antioxidant that protects against the harmful effects of free radicals, helps protect and repair the skin, stimulate cell renewal and promote healthy circulation.

Argirelox™ peptide
Vitamin C
Rosehip extract
Organic silica

Hyaluronic acid
Ginkgo biloba
Extract leuphasyl®

Ref. DC19

30 ml

ForeHead VitaSerum

Serum that reduces horizontal wrinkles on the forehead and vertical wrinkles between the eyebrows.

First product on the market focused on wrinkles on the forehead, it contracts the muscle and promotes its relaxation.

Provides firmness and elasticity of the skin; Reduces redness on the skin's surface and creates a lifting effect. Leaves skin less fatigued and more radiant.

Argireline® Amplified
Peptide
Munapsys™
Retinol

Ref. DC20

30 ml

RetinoLift VitaSerum

Improves fine lines and wrinkles, improves skin firmness and elasticity, fuels skin's youthful genes, improves texture, and increases skin's natural collagen production.
